## Preliminary Cache Report

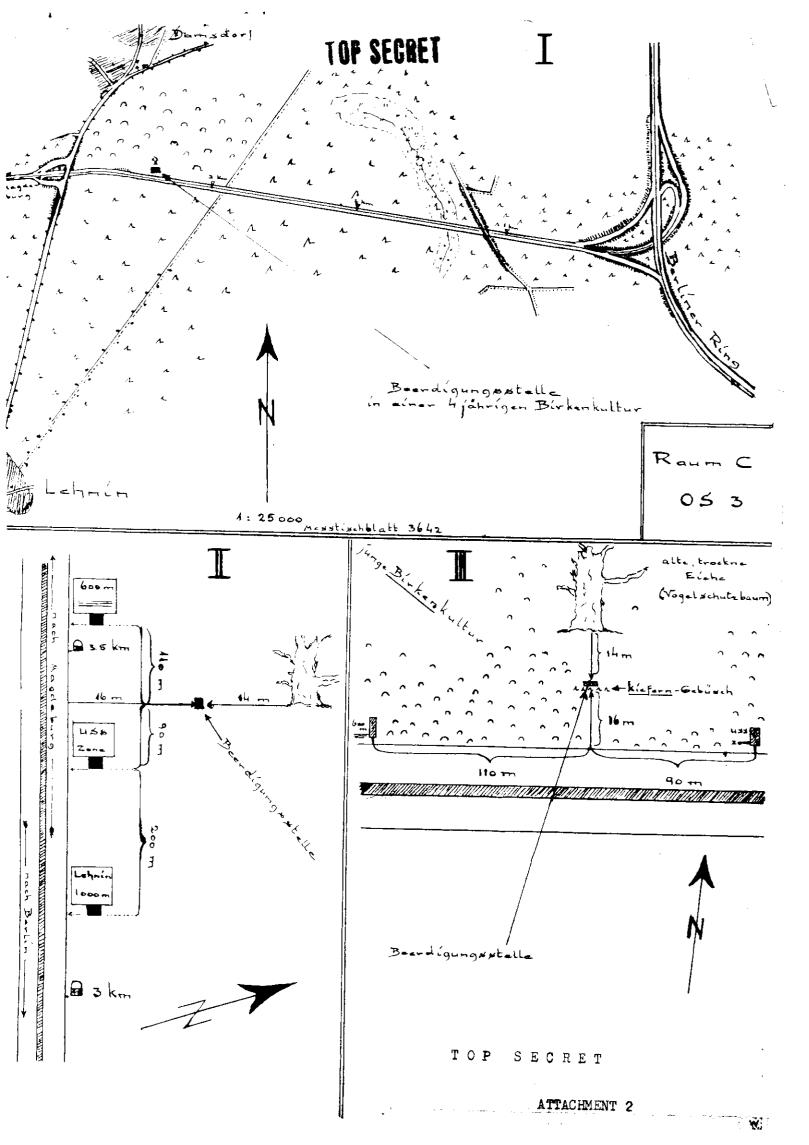

## Permanent Cache

- 1. a. One RS-6
  - b. Sand soil, moist
  - c. One man can carry about 17 pounds
  - d. Packaged individually
- 2. a. Temporary cache in East Zone, see previous Report, hand-carried to COM on 19 September by
  - b. MA
  - c. MA
  - d. MA
  - e. V=03 and V=349, East Zone Apparat members, will drive to the area in V=03's car. They will park on a side road in the vicinity of Damsdorf and proceed on foot to the cache site, see map. After a search of the area for the presence of other persons, they will cach the equipment at the site indicated on the map. They will alternate digging and look-out assignments.
- 3. a. The cache area is surrounded by young birch trees. It is accessible through the wooded area from the North. It is located near the Berlin-Magdeburg Autobahn between Potsdam and Brandenburg and approximately three and one half kilometers outside the Berlin Ring. A little more than three kilometers outside the Berlin ring, a sign on the Autobahn announces, "Lehnin 1000 M."

  Two hundred meters further West, a sign reads "USS Zene." Minety meters beyond the latter sign and 290 meters beyond the former lies the cache site, which is sixteen meters from the Autobahn, see map. One hundred and ten meters West of the cache stands the 600 meter sign for the Lehnin Autobahn exit. The cache lies between the Autobahn and an ancient oak, which serves as shelter for birds. The site is screened from the Autobahn by a row of pine shrubs, and is 14 meters South of the mak.
  - b. See sketch.
  - c. There are no unusual controls in the area, as it is well outside of West Berlin and does not lie in the neighborhood of any sensitive installations.
  - d. The equipment will be cached three feet under the surface of the earth.
